

# AFD: building a sustainable development

June 27, 2008

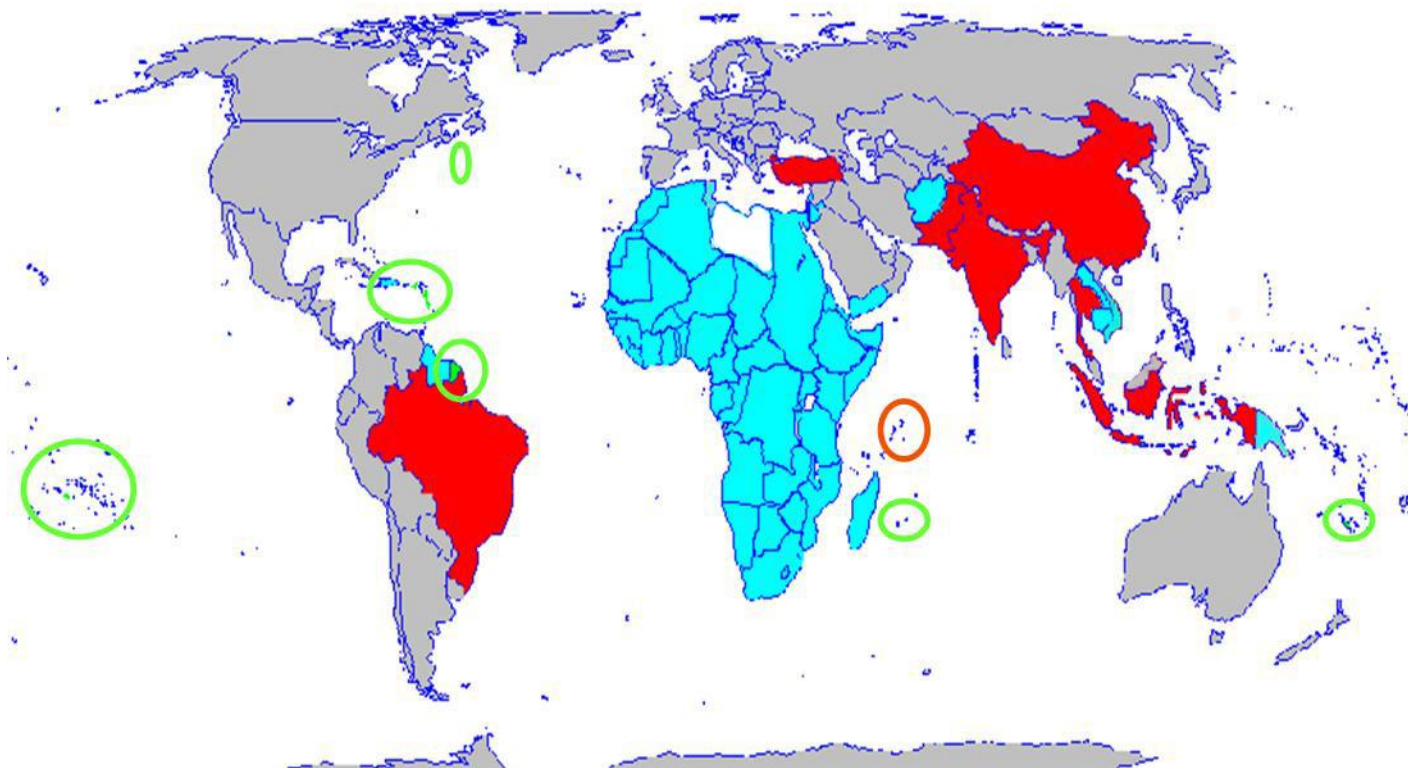

# Our mission

- The *Agence Française de Développement* (AFD) is a French governmental institution financing economic, social and environmental projects in the five continents.
- **AFD's mission is three-fold:**
  - **To reduce poverty and inequalities**
    - Contributing to UN Millennium Development Goals
  - **To support sustainable economic growth**
  - **To protect “Global Public Goods”**
    - Fight pandemics and climate change; preserve biodiversity and promote social and environmental responsibility
    - Support emerging countries challenges: environment, energy, waste, water...

# AFD at a glance

- Customers can be governments themselves, parastatal and private companies or municipalities.
- AFD Financial instruments :
  - Long term loans
  - Soft conditions if the project has a positive effect on global public goods
  - Non-sovereign financings
  - Grants for less developed countries
- PROPARCO: subsidiary dedicated to the financing of the private sector
- FGEF: French Global Environment Facility

# Geographical expansion to serve our three mandates

- Traditional regions**
  - Solidarity
- Overseas France**
  - Solidarity
- New regions**
  - Preservation

A global presence : AFD is financing projects in nearly 60 countries and has a network of 44 field offices in five continents

# Strategy and dynamic in Turkey

\*\*\*

**2009/2011**

# Our main goals

- To reduce the impact of the economic growth on the environment: promoting a carbon free development
- To support the binding of Turkey with Europe through the adoption of corporate and social responsible (CSR) practices

# Promoting a carbon free development

- **Our targeted activities:** financing projects about:
  - Renewable and clean energy production,
  - Pollution abatement and environmental,
  - energy efficacy,
  - urban transports.

# Promoting a carbon free development

## Partners:

- Local banks: credit lines for green investments (TSKB 100 M€): projects financed: solid waste management, hydroelectric power plant, windmills
- Municipalities: Istanbul (Metro), Kayseri (Tramway), Bursa (sewage sludge treatment plant)
- Private companies (innovative projects with a high environmental impact)

# Supporting companies CSR investments

- Our targeted activities:

Support investments of SMEs and lead them to adopt best social and environmental practices

- Partners:

- Local banks (TEB 40 M€)

# What is next?

- Environmental projects of municipalities
- Climate change credit lines to banks : main driver CO<sub>2</sub> emission reductions
- Private companies involvement for Kyoto
- Energy efficiency in building sector

**Thank you for your attention**
